What can you do to protect water?

Small actions can collectively make a big difference in protecting our waters.

At Your House

- What's good for wildlife is also good for water. Our [Certified Wildlife Habitat](#) program can help you practice good gardening and landscaping techniques.
- Dispose of household chemicals properly and limit the use of lawn chemicals
- Practice water conservation – turn of the water while brushing teeth or washing dishes
- Keep extra bacteria and nutrients out of the water by picking up pet poo

Have a Voice

- Register for [Voicelt](#) to learn about upcoming legislation regarding water and the environment

Report Pollution Problems

At the Stream

- Participate in a Stream Clean-Up.
- Don't mow grass all the way to the stream edge.
- Don't throw leaves or grass clippings in the stream or on the stream bank.
- Plant a native tree or shrub.
